Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the blinds having equal widths and being offset and a housing that permits the roller blinds to extend in different planes must be shown or the features canceled from the claims. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4,5,10 and 13 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by German patent '779.

See first 76 and second 78 roller blinds, coiling body 92, with one edge of one roller blind being axially offset from the opposite edge of the other roller blind. See also guides 84 and the housing being the vehicle itself.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pinkalla et al.

See one (rear) roller blind made of panels 34a and one panel 34b, and the other (front) roller blind made of two panels 34b, and/or 34c, with the rear panel being wider than the front panel and they have offset edges. See guides 60. Regarding claim 3, one roller blind consists of one panel 34b (rear) while the other roller blind consists of one panel 34b (front).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3634

Claims 7 and 15 are rejected under 35 U.S.C. 103(a) as being unpatentable over German '779 in view of German '919.

Providing edge "bands" to maintain the edges of a roller blind in guides is well known, as illustrated by '919. It would have been obvious to modify '779 to have such edge bands so as to maintain the blind in the track.

Claims 8 and 16 are rejected under 35 U.S.C. 103(a) as being unpatentable over German '779 in view of Jeuffray et al.

Providing a housing for the roller blinds is well known, if not inherent in the '779 reference. Jeuffray et al discloses such a housing 1. It would have been obvious to modify '779 to have such a housing so as obscure and support the roller mechanism.

Claims 10,12 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pinkalla et al in view of Kreautler.

Providing a housing for a roller device is well known, as illustrated by Kreautler. It would have been obvious to provide Pinkalla et al with such a housing so as to protect and hide the roller mechanism.

Allowable Subject Matter

Claims 6,9,11,14 and 17 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
